OUR STORY

An established name. A modern standard.

For close to two decades, the Armour name has been associated with dependable security and support services in Dehradun and beyond.

The agency brings together local operating knowledge, structured manpower management, international exposure and a service culture that respects both security and hospitality.

Nearly 18	12 years	24x7	Multi-sector
Years of operational experience	Founder's experience in the United States	Supervision and response	Healthcare, estates, hospitality and education

FOUNDER AND LEADERSHIP

Mr. Pravesh Gurung

Armour was established by Mr. Pravesh Gurung. His professional background combines long-standing security-industry experience in India with 12 years of experience in the United States, including exposure to operations involving Homeland Security, U.S. Customs and Border Protection, the FBI and the U.S. Coast Guard.

This combination of international exposure and long-standing local experience informs Armour's focus on disciplined conduct, clear escalation, preventive vigilance and responsive client service.

Protection

Vigilance centred on people, property and continuity.

Professionalism

Trained personnel, smart presentation and courteous conduct.

Preparedness

Clear post orders, supervision and prompt escalation.

WHAT WE DO

Integrated security and support services

Armour provides scalable manpower and site-support solutions, tailored to the operating realities of each client environment.

1 Manned guarding

Security guards, lady guards, supervisors, inspectors and security officers for static posts, access points and patrol duties.

2 Healthcare and institutional security

Security coverage designed for hospitals, schools, hostels, offices and other people-intensive environments.

3 Risk, safety and preparedness

Risk analysis, threat assessment, security and fire-safety audits, evacuation awareness and continuity planning.

4 Executive and event security

VVIP and executive protection, bodyguard support, event security and crowd-management deployment.

5 Vigilance and surveillance

Observation, preventive vigilance, investigation support and reporting to identify undesirable or unusual activity.

6 Housekeeping and facility support

Housekeeping personnel and related site-support resources aligned with client service standards.

7 Technical support manpower

Plumbers, electricians, horticulture staff, carpenters, car washers and other operational support roles.

8 Transport and specialised manpower

Chauffeurs and additional personnel categories mobilised according to the client's defined scope.

Armed personnel and specialised services are deployed only where legally permissible, appropriately licensed and included in the agreed scope.

HOW ARMOUR WORKS

A disciplined model from selection to review

Service quality depends on the system around every deployed person. Armour's operating approach connects recruitment, training, site readiness, supervision and response.

1 Selection and verification

Credentials and identity checks, police verification, medical fitness and role suitability before deployment.

2 Training and site readiness

Structured induction, physical drill, security fundamentals, conduct standards and site-specific briefing.

3 Deployment and post orders

Clear responsibilities, reporting lines, registers, access protocols and escalation procedures for each post.

4 Supervision and reporting

Field supervision, regular night checks, performance review and realistic incident reporting.

5 Response and improvement

Prompt escalation, client feedback, corrective action and continuous review of service standards.

OPERATING COMMITMENTS

- Single point of contact for security and safety services
- 24x7 supervision and prompt response discipline
- Police verification and medical fitness documentation
- Bank salary disbursement by the 7th of each month
- Implementation of applicable statutory requirements
- Regular client liaison and performance feedback
- Strong administrative and field-supervision backup

QUALITY MINDSET

Armour's 'Zero Error' philosophy is treated as a service aspiration: prevent avoidable lapses, report accurately, correct quickly and keep improving through supervision and client feedback.

SECTOR FOCUS

Vigilance with a hospitality mindset

Hospital security requires more than access control. It demands calm guidance, patient sensitivity, visible discipline and rapid escalation.

Armour's approach is designed to support safe movement, orderly public areas and continuity of clinical operations.

Entry and access control

Gate discipline, identity checks and controlled movement at designated access points.

Visitor and attendant management

Clear guidance, visiting-hour discipline and support for orderly circulation.

Staff entrance screening

Consistent checking procedures aligned with hospital policy and authorised access.

Emergency route control

Unobstructed ambulance movement, rapid access and coordinated escalation.

Lobby, lift and stair guidance

Visible presence to assist movement, queues and crowd control.

Sensitive-zone discipline

Controlled access around ICU and other restricted or high-sensitivity areas.

Parking and perimeter

Vehicle movement, parking order, patrols and observation of external areas.

Fire and evacuation support

Trained response, route awareness and assistance during drills or emergencies.

Incident reporting

Prompt communication, accurate registers and structured handover between shifts.

Courteous public interaction

Professional conduct that balances firm security with empathy and hospitality.

Relevant experience includes assignments across hospitals and healthcare institutions in Dehradun, supported by Armour's wider background in senior living, estates and hospitality environments.
